
RUN YOUR FIRST GATE

QUICK-START CARD · VERSION 1.0

01

CREATE A PROJECT

Claude Project or ChatGPT Project

02

LOAD THE OPERATOR

Add the operator files listed in the manual

03

PASTE A WORKFLOW

Describe what it does and what can go wrong

04

CHECK TERMINAL ACTION

Then read verdict, surface, and artifact

FIRST TEST

We generate a weekly KPI report every Monday.
A human provides stable exports. Produce a
Slack-ready narrative summary. Errors are
correctable by posting a revised report.

READ THE OUTPUT

1

SNAPSHOT

Confirm the Gate understood the workflow.

2

DECISION PACKET

Read verdict, surface, confidence, and controls.

3

ARTIFACT

Use the document to implement the decision.

THE GATE DECIDES.

IT DOES NOT EXECUTE.

CHECK THE TERMINAL ACTION BEFORE ACTING.
